

Propelled Technologies Capability Statement

Core Competencies

NAICS CODE 541512 -CYBERSECURITY

Our PT Cyber Professional has performed and reviewed numerous technical security assessments of department of defense systems and sensors to identify points of vulnerability, non-compliance with established cybersecurity standards and regulations and recommended mitigation strategies. The ISSE has applied Security Technical Implementation Guidelines and other required system cybersecurity controls in order to meet and DoD, Cybersecurity Requirements.

NAICS CODE 541512 -Consolidated Administrative Systems Support homework what they are looking for

PT OSE has 8-10 years work experience directly related to Cyber Exploitation, Penetration testing, cyber counter intrusion/defense, and military cyber operations and planning. Offensive security engineers have high proficiency in vulnerability research, reverse engineering, and software/hardware exploitation

PT Configuration managers have extensive experience with establishing and maintaining the consistency of information regarding the design requirements, functional and physical attributes, and operational information of enterprise configuration items (CIs).

Differentiators

PT main differentiator is that we have worked with providing assessments on Department of Defense (DoD) Environment at all levels of the systems life cycle within the DoD as an ISSE, IATE, OCE, ECM an ISSE role advising and assisting leadership. The unique approach to approaching, identifying, assessing, reporting and advising has proving to move systems toward getting an ATO. Therefore the way we develop RMF documentation to achieve ATO and/or a IATT to support program is efficient and with no negative impact to mission.
