

Propelled Technologies Capability Statement

The Requirement

The interim rule became effective on November 30, 2020. The public review and comment period for DFARS Case 2019-D041 ended on November 30, 2020. Due to its designation as a major rule change, the interim rule must also complete a Congressional Review. Specifically, the Department of Defense has mandated that all contract holders be certified in the Cybersecurity Maturity Model Certification (CMMC) by 2025. The CMMC-Accreditation Body (AB) highly recommends all contractors START TO PREPARE NOW!

Why choose us?

We have been approved by the CMMC-AB as a CMMC Registered Provider Organization (RPO), Registered Practitioner (RP), and currently an approved Certified Third-Party Assessor Organization (C3PAO) Candidate, to provide training and prepare organizations seeking the CMMC credential for their company. With PT being CMMC-AB approved we are uniquely positioned to provide training and consulting services to the Maxwell/Gunter small business Defense Industrial Base (DIB) community.

Our highly certified Security Engineers have over 18 years of subject matter expertise providing cybersecurity services to Gunter AFB via AFLMC AFSPC, 26 NOS also the Army via Redstone Arsenal, AMC. During this time PT has become a member of the Montgomery Industry Partners (MIP) a collection of DoD contractor small businesses in the area, so we already know the customer. Protecting the Confidentiality, Integrity and Availability of your information in line with DoD and other military grade standards is what we do best! Our methodology, when followed, allows us to accomplish this at no impact to mission.

Past Performance

FA8771-12-D-1005
2017-2018
